Ph.D. candidate with industry experience working on reasoning, generalization, robustness & efficiency.

EDUCATION

Mila, Inria, Université Laval	Aug 2021 - Present
Ph.D. in Machine Learning. Advisors: Christian Gagné & Frédéric Precioso . (GPA: 4/4)	(Expected: Apr 2027)
Keywords: <i>reasoning, generalization, robustness, efficiency, LLMs, VLMs, finetuning</i> .	
Indian Institute of Science (IISc) - Bangalore	2014 - 2016
Masters in Computational and Data Science. Advisor: Sathish Vadhiyar . (Top 5 in class)	
National Institute of Technology (NIT) - Surat	2010 - 2014
Bachelors in Mechanical Engineering.	

WORK EXPERIENCE

ServiceNow - Research Intern	Feb 2026 - Present
◦ LLM Web Agents : Blackbox VLM finetuning for visual grounding & collaboration-based task-specific steering.	
Amazon - Research Intern	Jun 2025 - Oct 2025
◦ LLM finetuning [1]: Improved LoRA finetuning by conditioning on CoT reasoning chains for entailment/math.	
NVIDIA - System Engineer II	Aug 2016 - May 2018
◦ Self-Driving Car Display : Implemented new features, reducing bugs (60%) and improving user experience.	
◦ Resource Management : Designed modular device tree framework, cutting cross-team development time (30%).	
◦ Xavier Chip's Launch : Implemented critical modules for successful launch & performance boost (25%).	
Donut Research Labs (Walmart) - NLP Engineer	May 2018 - Feb 2019
◦ Text Generation : Improved product brand name extraction accuracy (40%) using a Seq2Seq model, pretrained on product descriptions, fine-tuned on noisy annotations, and top-k sampling with beam search.	
◦ Extreme Text Classification : Class-imbalance-aware LSTM improved accuracy (25%) & sped inference (10%).	
◦ Product Specs Extraction/OCR : Single Shot Detector based information extraction, improving perf (35%).	
◦ Dataset Building : for text generation & OCR projects (collection, annotation, cleaning).	
IISc Bangalore (Ati Motors, Tata Motors) - Research Associate	Feb 2019 - Aug 2020
◦ Image Generation [11, 18, 26]: Enhanced LiDAR generation, high-res image generation & scene-flow prediction.	
◦ Robotics [7, 10, 28]: Differentiable SLAM framework & deployed cost-effective driver assistance system (ADAS).	
IISc Bangalore (Niramai) - Research Associate	Aug 2020 - Aug 2021
◦ Multi-Task Generalization [6, 25]: Improved domain adaptation and explainability for smartphone-transmitted X-rays using Multi-Task Learning and deployed it as a text-based reporting tool during the COVID-19 pandemic.	
◦ Model Explainability [15, 16, 27]: Aligned concept extraction with human understanding, improved it using non-negative matrix factorization, and exposed adversarial vulnerabilities in popular explainability methods.	

ACADEMIC EXPERIENCE

Mila, Université Laval - Student Researcher	Aug 2021 - Present
◦ Test-time Finetuning [3, 12]: Enhanced adaptation to distribution shifts using optimal layer selection for test-time adaptation and self-distillation of CLIP for zero-shot image classification.	
◦ OOD Generalization [9, 14]: Improved generalization to distribution shifts using out-of-distribution methods and denoising incorrect predictions using diffusion models.	
◦ Adversarial Robustness [2, 5, 13]: Enhanced adversarial defense by using softmax predictions to detect vulnerable samples cheaply and using test-time adaptation.	
◦ Out-of-Distribution (OOD) [4, 17]: Improved OOD detection using gradients from OOD prototype and optimized microservice partitioning by reformulating it into a reinforcement learning (RL) problem.	
◦ Continual Learning [8, 24]: Reduced forgetting in continual learning through hessian-aware low-rank approximation and showed that simple ensembling (bagging/dropout) can outperform complex strategies.	
Computational and Data Science, IISc Bangalore - Student Researcher	Aug 2015 - Aug 2016
◦ Visual Semantic Search [19]: Extracted hierarchical relationships between visually similar classes in CNNs.	
◦ Parallel Computing [20, 22]: Scaled scientific applications on supercomputers/GPU using MPI & CUDA.

TEACHING AND LEADERSHIP ROLES

- **Teaching Assistant**, Machine Learning course, Université Laval (2022/2023/2024): Involved with designing and grading quizzes/homeworks, and conducting tutorial sessions.
- **Student Mentor**, [SHARE Research Labs](#) (2020-21): Teaching and mentoring students for working towards a research paper for top-tier conferences.
- **Organizer** of various reading groups on topics like Machine Learning (2022-23), Out-of-Distribution (2022-25), and Autonomous Navigation (2019-20).
- **Placement Coordinator**, IISc (2015-16): Invited, organized, and coordinated on-campus placement for numerous industries and startups.

HONORS AND AWARDS

- Awarded [IID Excellence scholarship 2022](#).
- Secured research funding from [DEEL](#) (2021-Present).
- Secured research funding from [Ati Motors](#) (2019-21), and [ARTPARK](#) (2021).
- Awarded distinction for my master’s thesis.
- Won various competitions: 1st place in [NeurIPS 2017 Challenge](#), top finalist in [NVIDIA Reinforcement Learning Competition 2018](#), 3rd place in [SO1 Product Recommendation Competition 2018](#).
